

Filip Strózik

Full-Stack Software Engineer | AI/ML Engineer

Wrocław, Poland | +48 661 935 263

filiparkadiuszstrozik@gmail.com | github.com/Filipstrozik | LinkedIn

Summary

Full-stack software engineer focused on .NET and Angular, with experience in web applications, testing, deployment, and maintainable architecture. AI master's graduate with practical work in machine learning, computer vision, audio analysis, and speaker verification.

Experience

Uhlmann Pac-Systeme (Pexcite)

09/2025–Present

Full-Stack Developer

.NET, Angular

- Develop large-scale logistics applications with .NET and Angular.
- Implement new features and optimize existing functionality.
- Work with modular architecture, system diagrams, SignalR, and RabbitMQ.
- Architect and implement a simulation service for real machine connection states and message handling.
- Build Cypress end-to-end test automation for production validation.
- Develop Angular components for real-time connection monitoring and document maintainable architecture.

OAI Poland

02/2026–05/2026

ML Engineer, Data Scientist

Python, Machine Learning

- Prepare the 2026 Polish AI Olympiad task, designing Task Arithmetic challenges involving model weights.

Alfa-Net

02/2023–08/2025

Full-Stack Developer

.NET, Angular

- Deploy Docker services, manage database migrations, and configure production load balancers.
- Deliver core features and manage Playwright end-to-end automated testing in GitLab pipelines.

OAI Poland

04/2025–06/2025

ML Engineer, Data Scientist

Python, Machine Learning

- Prepare one of the final tasks for the Artificial Intelligence Olympiad in Poland 2025.

Alfa-Net

01/2023–02/2023

Junior Full-Stack Developer

.NET, Angular

- Built responsive .NET and Angular applications and contributed across full-stack projects.

Selected Projects

MultimodalAuth – Audio and Video Authentication

Project

Co-authored a Python ML system combining voice and face verification for deepfake detection.

Polwro MLOps Pipeline

GitHub

Built an MLOps pipeline for scraping, processing, and serving models from Polwro forum reviews.

Satellite Trees Detection

GitHub

Created satellite-image datasets and trained an Eclipse-RCNN tree-detection model; published datasets on Hugging Face.

Sound Cluster

GitHub

Built an audio-analysis and PCA-clustering visualization tool for music-production applications.

Technical Skills

Languages: C#, Python, TypeScript, SQL, HTML, CSS, PowerShell

Backend: .NET, ASP.NET Core, Entity Framework, Spring Boot, Nest.js

Frontend: Angular, React, Angular Material

Testing and delivery: Cypress, Playwright, Jest, Docker, GitLab CI/CD, Azure DevOps

Machine learning: PyTorch, scikit-learn, Pandas, NumPy, OpenCV, Hugging Face, audio processing

Infrastructure: Azure, Linux, Docker, nginx, Apache Spark, Celery, RabbitMQ, Redis, MongoDB

Languages: English (C1+), German (A1), Polish (native)

Education

Wrocław University of Science and Technology

2023–2025

M.Sc. Artificial Intelligence

Thesis: Analysis of noisy samples in speaker authorization

Wrocław University of Science and Technology

2019–2023

B.Sc. Applied Computer Science

Thesis: A system supporting car-parking operations – ParkVision

Achievement

BeeARD x Science Hackathon 2025 – 2nd place; co-authored an AI research platform with agent-tool integrations.
