

Filip Strózik

Full-Stack Software Engineer | AI/ML Engineer

Wrocław, Poland | +48 661 935 263 | filiparkadiuszstrozik@gmail.com | github.com/Filipstrozik | LinkedIn

Summary

Full-stack software engineer focused on .NET and Angular, with experience in web applications, testing, deployment, and maintainable architecture. AI master's graduate with practical work in machine learning, computer vision, audio analysis, and speaker verification.

Experience

Uhlmann Pac-Systeme (Pexcite)

Full-Stack Developer

09/2025–Present

.NET, Angular

- Develop large-scale logistics applications with .NET and Angular.
- Implement new features and optimize existing functionality.
- Work with modular architecture, system diagrams, SignalR, and RabbitMQ.
- Architect and implement a simulation service for real machine connection states and message handling.
- Build Cypress end-to-end test automation for production validation.
- Develop Angular components for real-time connection monitoring and document maintainable architecture.

OAI Poland

ML Engineer, Data Scientist

02/2026–05/2026

Python, Machine Learning

- Prepare an Artificial Intelligence Olympiad task for Poland 2026.
- Design Task Arithmetics challenges involving model weights.

Alfa-Net

Full-Stack Developer

02/2023–08/2025

.NET, Angular

- Deploy services with Docker and manage database migrations.
- Configure production load balancers.
- Deliver core features across active projects.
- Plan and manage Playwright end-to-end testing in GitLab pipelines.

OAI Poland

ML Engineer, Data Scientist

04/2025–06/2025

Python, Machine Learning

- Prepare one of the final tasks for the Artificial Intelligence Olympiad in Poland 2025.

Alfa-Net

Junior Full-Stack Developer

01/2023–02/2023

.NET, Angular

- Build responsive web applications with .NET and Angular.
- Contribute to multiple application projects across the full stack.

Selected Projects

SV-Eval – Speaker Verification

Evaluated the impact of noise on voice authentication across multiple speaker-verification models.

GitHub

Polwro MLOps Pipeline

Built an MLOps pipeline for scraping, processing, and serving models from Polwro forum reviews.

GitHub

Satellite Trees Detection

Created satellite-image datasets and trained an Eclipse-RCNN tree-detection model; published datasets on Hugging Face.

GitHub

Sound Cluster

Built an audio-analysis and PCA-clustering visualization tool for music-production applications.

GitHub

Technical Skills

Languages: C#, Python, TypeScript, JavaScript, SQL, HTML, CSS

Backend: .NET, ASP.NET Core, Entity Framework, Spring Boot, Nest.js

Frontend: Angular, React, Angular Material

Testing and delivery: Cypress, Playwright, Jest, Docker, GitLab CI/CD, Azure DevOps

Machine learning: PyTorch, scikit-learn, Pandas, NumPy, OpenCV, Hugging Face, audio processing

Infrastructure: Azure, Linux, Docker, nginx, Apache Spark, Celery, RabbitMQ, Redis, MongoDB

Languages: English (C1+), German (A2)

Education

Wrocław University of Science and Technology

M.Sc. Artificial Intelligence

2023–2025

Thesis: Analysis of noisy samples in speaker authorization

Wrocław University of Science and Technology

B.Sc. Applied Computer Science

2019–2023

Thesis: A system supporting car-parking operations – ParkVision

Achievement

BeeARD x Science Hackathon 2025 – 2nd place; co-authored an AI research platform with agent-tool integrations.
